

# INDIUM SOFTWARE (INDIA) PRIVATE LTD.

DIGITAL ENGINEERING SOLUTIONS

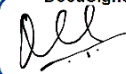

## INFORMATION SECURITY POLICY

All customer and internal information used to support the business operations of Indium will be treated as Organisational Assets and shall be protected during its creation, useful life, and disposal.

Confidentiality, Integrity, and Availability of these Assets shall always be ensured to meet the business requirements. This includes ensuring the data privacy of the customer and all the relevant stakeholders.

These Assets shall be classified and maintained depending on its sensitivity, legality, retention requirements, and types of access required. The Information Security Forum shall provide management support to develop and implement relevant security control objectives and continually improve our Information Security Management System.
